

Assignment 3

Shivangi Parashar

Determinant

Abstract—This documnet contains the solution to find the value of given Determinant.

1 PROBLEM

Evaluate the following: $\begin{vmatrix} x & a & x+a \\ y & b & y+b \\ z & c & z+c \end{vmatrix} = 0$

2 SOLUTION

Given determinant: $\begin{vmatrix} x & a & x+a \\ y & b & y+b \\ z & c & z+c \end{vmatrix} = 0$

Applying transformation:

$$\begin{vmatrix} x & a & x+a \\ y & b & y+b \\ z & c & z+c \end{vmatrix} \xrightarrow{C_3 \leftarrow C_3 - C_2} \begin{vmatrix} x & a & x \\ y & b & y \\ z & c & z \end{vmatrix} \quad (2.0.1)$$

$$\begin{vmatrix} x & a & x \\ y & b & y \\ z & c & z \end{vmatrix} \xrightarrow{C_3 \leftarrow C_3 - C_1} \begin{vmatrix} x & a & 0 \\ y & b & 0 \\ z & c & 0 \end{vmatrix} \quad (2.0.2)$$

From 2.0.2 If any row or column of determinant is zero ,than it's value is zero

$$\begin{vmatrix} x & a & x+a \\ y & b & y+b \\ z & c & z+c \end{vmatrix} = \begin{vmatrix} x & a & 0 \\ y & b & 0 \\ z & c & 0 \end{vmatrix} = 0 \quad (2.0.3)$$
